**DETAILED ACTION**

1. This action is in response to the amendment filed 4/10/2009.
2. Claims 1-8 and 10-14 are currently pending.

***Allowable Subject Matter***

3. Claims 1-8 and 10-14 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The incorporation of the limitations of "*determining whether a total play time of the selected first video clip is greater than a predetermined time*" and than either playing the selected clip or segmenting the clip based on the determination, into the independent claims 1 and 6, renders moot the anticipation rejection of Nakajima et al. (US 6,026,389).

The closest art of record are that of Nakajima. Nakajima teaches of a method of querying a video utilizing a macro and micro browser. After a user selects a video (see Fig. 3) the video is placed into the motion picture query window (see Fig. 6). The user may then browse the selected video in the macro browser window where the browsing is performed in a first time step, such as, for example, 5 minute or 10 minute steps (see column 6, lines 17-25). Once a user has selected a clip in the macro browser, for example a 10 minute clip, the user may then use the micro browser to browse through the 10 minute clip where the micro browsing is performed on the selected clip using a time step shorter than that of the macro browser, such as, for example, 1 minute or even individual

Art Unit: 2175

frames (see column 6, line 58 – column 7, line 5). Therefore, Nakajima teaches of a method of selecting a video clip and dividing the clip into a plurality of second video clips (macro or micro units). However, Nakajima fails to disclose or suggest determining whether a total play time of the selected first video clip is greater than a predetermined time. While Nakajima does disclose displaying the total time of video clips (see Fig. 3, #32), Nakajima makes no mention of comparing this time to a predetermined time. On the contrary, Nakajima teaches that in relation to their micro and macro browser that a user may play the selected video clip utilizing the “start” buttons (Fig. 6, #65 and 604) and in no way involves comparing the total play time to a predetermined time in determining whether to play a clip.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

-Iggulden et al. (US 5,999,688), method and apparatus for controlling a video player to automatically locate a segment of a recorded program.

-Nagasaka et al. (US 6,157,744), method and apparatus for detecting a point of change in a moving image.

Art Unit: 2175

-Sull et al. (US 2002/0069218), system and method for indexing, searching, identifying, and editing portions of electronic multimedia files.

-Shih (US 2006/0015888), method of searching for clip differences in recorded video data of a surveillance system.
